The state criteria that is used is defined in section 29.081 of the Texas Education Code which are listed under the 13 indicators that identify a student as at-risk.

In addition, the local indicator is based on a student's migratory status. The programs that are available for students that are at-risk for dropping out are tutoring, counseling, alternative schools, differentiated instruction, employment training, intervention programs, communities in schools, close follow up procedures on truancy and absenteeism. The students that are targeted to participate fall under the 13 indicators that identify a student as at-risk as per the Texas Education Code. There are 67.30% at-risk students out of the school's total population. The attendance rate is 96.5% for all students and 96.0% for at-risk students. Perceptions

Perceptions Summary

After thorough review of multiple data sources, the SBDM Committee assessed the overall school culture and determined that the effective approaches to improving school climate involve collaborative planning, collegial work, and a school atmosphere conducive to experimentation and evaluation and view all school staff (teachers, paraprofessionals, custodians, secretaries) as important contributing members who are engaged in the development of activities that take place over time. Similarly, students, parents, and community members must be included in projects to address school climate. Inviting a parent or student as a token representative will not be enough; to foster an investment in the project, individual contributions and participation must be welcomed, respected, and valued as part of school-wide efforts.

Overall, there were 70 online surveys submitted. Of the seventy surveys submitted, 35% had students in 6th grade, 35% had students in 7th grade, and 44% had students in the 8th grade. The majority of the respondents (parents) visited the school at least once per month and are concerned about their student's safety and school atmosphere. To this end, they are somewhat satisfied with their students' level of academic performance and motivation. In addition to student safety and environment, parents voiced their concerns about improving district wide parent events and educating students/parents on the topics of cyber bullying, dangers of facebook, discipline (runaways), homework skills and counseling kids for drugs/gangs. Many of the respondents were concerned about these issues and also stated that it would be best for parent meetings to be held after school because it would be more convenient with their work schedule.

The purpose of this survey was to determine how well Perkins Middle School provides quality service experiences to parents, students, faculty and staff in three areas: safety, teaching and learning, and relationships. The quantitative and qualitative findings of this study indicate that there are several areas of need. These areas of need span all categories evaluated.

Academic Planning and Professional Development Networks, SBDM committee recommends that we continue to address the academic deficiencies identified. Those deficiencies have been identified as safety, teaching and learning, and relationships. There are four recommendations listed below.

- Student achievement is the greatest priority of all educational needs. It is recommended that all professional staff attend training to address the identified academic/instructional student needs. In addition, it is essential to develop positive relationships among students and teachers. This will also create a common practice among everyone in the building, which establishes consistency in communication and ultimately protocol. Establishing this practice should focus on five major components: self-control, unconditional positive regard, teaching expectations, classroom arrangement, and effective delivery of instruction.
- Secondly, there is a need for strengthening teacher preparation both in content and effective teaching practices. As means of addressing this issue, teachers need to be provided content based professional learning opportunities that will provide them with the instructional skills and best practices needed for preparing, developing, and implementing rigorous lessons.
- Thirdly, it is recommended that Perkins continues to develop professional learning communities (PLC), that established a platform for discipline-based teams to communicate across grade levels as well provides grade level teams to evaluate student performance, behavior, and deficiencies. The PLC platform should also be used to develop pathways of communication among school staff and internal/external administration that provides staff with input in the decision-making process.
- Finally, the continued development of parental involvement programs that provide parents with support for their child's learning at home, information about the instructional program, student performance data and opportunities for shared decision-making as well.

These recommendations should serve as suggestions to guide Perkins Middle School in our efforts to continuously improve and grow as we establish future goals and objectives in our endeavor to ensure that quality services/instruction are being provided to our stakeholders.

Note: This policy addresses bullying of District students. For purposes of this policy, the term bullying includes cyber-bullying.

For provisions regarding discrimination and harassment involving District students, see FFH. Note that FFI shall be used in conjunction with FFH for certain prohibited conduct. For reporting requirements related to child abuse and neglect, see FFG.

Bullying Prohibited

The District prohibits bullying, including cyberbullying, as defined by state law. Retaliation against anyone involved in the complaint process is a violation of District policy and is prohibited.

Examples

Bullying of a student could occur by physical contact or through electronic means and may include hazing, threats, taunting, teasing, confinement, assault, demands for money, destruction of property, theft of valued possessions, name calling, rumor spreading, or ostracism.

Retaliation

The District prohibits retaliation by a student or District employee against any person who in good faith makes a report of bullying, serves as a witness, or participates in an investigation.

Examples

Examples of retaliation may include threats, rumor spreading, ostracism, assault, destruction of property, unjustified punishments, or unwarranted grade reductions. Unlawful retaliation does not include petty slights or annoyances.

The principal or designee shall also notify a parent of the student alleged to have engaged in the conduct within a reasonable amount of time after the incident is reported.

If so, the District shall proceed under policy FFH. If the allegations could constitute both prohibited conduct and bullying, the investigation under FFH shall include a determination on each type of conduct.

The District may notify law enforcement in certain circumstances.
<i>Discipline</i>	A student who is a victim of bullying and who used reasonable self-defense in response to the bullying shall not be subject to disciplinary action.

STUDENT WELFARE
